Hi Guy,

Thank you for the opportunity to participate in the latest Se WG meeting. Unfortunately I needed to leave the meeting after lunch to make my flight home and was not able to see the presentations in the afternoon. Do you know if the presenters in the afternoon would be willing to share their presentations with me (and possibly a colleague at USGS)? I am particularly interested in the talks from the Environmental Effects of Selenium; Analytical Considerations section of the day:

Algal uptake of Se; speciation and species matter (*Carrie Rickwood*)

Selenium research in boreal lake food webs: EF, TTF, WTF? (*David Janz*)

Moving towards a Standardized Approach for Microbiological and Genomic Testing in Selenium Treatment (*Monique Simair*)

Method Validation of Soft Tissue Elemental Analysis (*Jennie Christensen*)

Thanks,
Karen

Importance: High

Sorry, Lars, please see the attached, as discussed earlier this evening.

Cheers,
Guy.

NAMC-SWG Folks:

Good morning. This is my final update to you regarding our upcoming November 8th meeting in Toronto (the day after the end of SETAC 2019). I look forward to seeing you all this coming Thursday evening or Friday morning. Thanks to all of you who have contacted me with questions, suggestions and offers to present; much appreciated.

Several quick things for you this week, in advance the meeting:

- Sorry I missed this in the last update.....the no-host dinner at Reds Wine Tavern (see below) on **Thursday evening is set for 6:30 p.m.** arrival.

- **If you are attending by phone and haven't received the call-in information, please let me know.**
- The location of the meeting - as indicated - is **Room GB202** at the University of Toronto (Chemical Engineering and Applied Science Department) - the building is the **Galbraith Building**(NOTE: DO NOT go to the Wallberg Building). I have attached 2 maps to assist with this.
- For those of you who are presenting, please forward to me your presentation (PowerPoint format) files as soon as you can this week, but no later than Thursday night. This will obviously help make meeting logistics, timing, etc., much smoother. Thanks in advance for that.
- I have attached the final agenda and attendance list. I will have hard copies on the day of the meeting, for any of you who need/want one.

Let me know if there are any errors or concerns with this information.

Also, finally, feel free to provide me with any suggestions, questions, or recommendations. As always, I welcome your input.

Cheers,

Guy Gilron, MSc, RPBio, ICD.D
Executive Secretariat, NAMC-SWG.
